Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 14 June 2005.
- 2a) ☐ This action is FINAL. 2b) ☒ This action is non-final.

DETAILED ACTION

Allowable Subject Matter

The indicated allowability of claim 20 is withdrawn in view of the further review of the reference JP 2003-79417. Rejection(s) based on this reference follow.

Claims 1 and 3-12 are allowed.

Claims 16 and 18 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Drawing Objections

The drawings are because they show the umbrella, which is now positively part of the claimed combination, in dashed lines that are used to signify that the umbrella is not being claimed in combination. Applicant is required to fill in the lines for the umbrella so as to show to a viewer that the umbrella is part of the claimed combination. A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. §102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

Claims 13 and 14 are rejected under 35 U.S.C. §102(a) as being clearly anticipated by JP 2003-49417.

Art Unit: 3677

JP 2003-49417 (figures 1-5) teaches the combination of an umbrella that can obviously be used outdoors with a ring 1, wherein the ring removably extends around the body of the umbrella to prevent the umbrella from opening, and a handle 2 that is fixable a coupled to the ring, and wherein the handle is utilized to place the ring on the umbrella. In regard to claim 14, the handle 2 comprises a rod like member and a handhold, wherein the rod like member extends between the ring in the handhold. This is shown in figure 5.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. §103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 15, 17 and 20 are rejected under 35 U.S.C. §103(a) as being unpatentable over JP 2003-49417.

JP 2003-49417 (figures 1-5) teaches the combination of an umbrella that can obviously be used outdoors with a ring 1, wherein the ring removably extends around the body of the umbrella to prevent the umbrella from opening, and a handle 2 that is fixable a coupled to the ring, and wherein the handle is utilized to place the ring on the umbrella. The difference is that the ring is not decorated by having ornaments fitted into cutout areas. However, decoration for aesthetic appearance is a common improvement and applicant is given Official Notice that the use of trim within openings of a ring for decorative purposes is well known in the art as a matter of improved aesthetic appearance. In regard to claim 20, JP 2003-49417 inherently teaches a method of securing an outdoor umbrella wherein the method comprises closing an umbrella such

that the post and the ribs of the umbrella are folded together, positioning an umbrella retaining apparatus adjacent the end of the umbrella opposite the handle of the umbrella, wherein the umbrella retaining apparatus comprises a ring coupled to a handle, placing the ring about the end of the umbrella opposite the handle of the umbrella, and the sliding the ring until the inner diameter of the ring is commensurate with an outer surface of a cross-sectional circumference of the umbrella. The difference is that as shown in the figures of this publication, the umbrella is shown with the handle of the umbrella up. However to change the orientation of the umbrella so that the handle is down would have been obvious change in the orientation of the umbrella. It is common to close and secure an umbrella in multiple orientations so that this would have been within the ambit of one having ordinary skill in the art.
